Summary

.NET Engineer with experience of developing web and cross-platform applications using ASP.NET Core, MVC, RESTful Web APIs, .NET MAUI, C#, and Entity Framework Core. Skilled in building reliable backend functionality, integrating APIs, managing database operations, and creating responsive, user-friendly application interfaces.

Experience

Software Engineer

Systonova (PK)

01/26 – Today

Case Management System (CMS)

- Mobile Application Development:** Developed a responsive case-tracking mobile application for cross platforms using .NET MAUI, C#, and XAML.
- RESTful API Integration:** Connected the mobile application to multiple backend services by securely and efficiently integrating RESTful Web APIs.
- Case Management:** Case creation and updates, status tracking, case assignment and reassignment, and case-related meeting management.
- Documentation and Collaboration:** Document and attachment uploads, adding notes and comments, and complete activity history tracking.
- Identity Management:** Implemented secure external access with Microsoft Entra ID External Identities for authentication and authorization for clients.

Collaboration Tools

- Azure DevOps:** Used Azure Boards to manage tasks, bugs, and work items, and Azure Repos for Git-based source control, and code collaboration.

Associate Software Engineer

Tekhqs (PK)

07/25 – 12/25

Human Resource Management System (HRMS)

- Backend Development:** Developed and enhanced key modules of a Human Resource Management System (HRMS) using ASP.NET Core and C#.
- API Integration:** Created and integrated RESTful Web APIs to support core HR processes, business workflows, and data exchange between components.
- Collaboration Tools:** Jira to manage tasks, work items and project tracking; GitHub for version control, repository management, and code collaboration.

Final Year Project (FYP)

University of Education (UE)

Online Auction Web Application

- Frontend Development:** Created modern, responsive, interactive, and user-friendly interfaces using HTML, CSS, JavaScript, Bootstrap, and Razor Views.
- Backend Development:** Developed core application logic and server-side functionality using ASP.NET Core MVC and C#, with Entity Framework Core.
- Database Management:** Used SQL Server management studio for database management to store, manage, and retrieve application data.
- Payment Integration:** Integrated the Stripe Payment Gateway to enable secure and reliable online payment processing and payment confirmation.
- Management:** User authentication, profile management, auction browsing and searching, bid placement, order management and administrative controls.
- Real-Time Communication and updates:** Integrated SignalR to provide real-time bid updates and enable live chat between bidders during auctions.

.Net Internship

Halim Sol (PK)

06/23 – 08/23

Employee Attendance Management System

- UI Modernization:** Redesigned WPF desktop application interfaces using XAML and Material Design principles for modern and user-friendly experience.
- Database:** Created and updated SQL Server queries to retrieve required data and produce accurate results, supporting effective system management.

Skills

Backend Development

Languages: C# (.NET 8/9/10), JavaScript

Frameworks: ASP.NET Core, Web API, WPF, MVC, SignalR

Databases: SQL Server

ORM: Entity Framework Core

Frontend Development

Languages: HTML5, CSS3

Frameworks & Libraries: Blazor, MAUI, Tailwind CSS, Bootstrap

Security & Authentication

JWT, ASP.NET Core Identity, Entra Id External Identities

Collaboration & Professional Skills

Project Methodologies: Agile (Scrum, Kanban), DevOps practices

Collaboration Tools: Jira, Azure DevOps, GitHub

Professional Skills: Problem Solving, Teamwork, Strong Work Ethic

AI Tools

Claude Code, Codex

Education

Bachelor of Computer Science

University of Education Lahore, Vehari Campus

3.55/4.0
